

FOOD&I

BANQUETING

WILLEMSWERF

2023

WELCOME

Introduction

Food is something fantastic. At Food&i we understand that every time to dine should be something special. It is also important that your order is always on time, you can order quickly, and the range offers enough variety for everyone - even if you order several times a week.

Orders for the standard meeting service and lunches can be placed the day before by 12:00 via the Facility Desk. For drinks/receptions at the department, please reserve at least 5 days in advance via the Facility Desk.

A food book is nothing new. But with our corporate offer we go one step further. Forget the old range. Food&i rocks your buffet and turns any meeting room into a connoisseur's delight. Join us on a journey and browse through our colour packages. Each package has a slightly different touch, for different meal times and a varied food style. Of course you can shop around, or still order our icons as an extra at the end. So no worries, it's just tasty dining.

Our range is a mix of animal and vegetable products. Choosing a fully plant-based range is also obviously an option. Everything you find in this food book has a transparent nutritional value, prepared with as much vegetables, fibres and healthy proteins as possible. And where possible the selection is made with animal welfare in mind. Examples are our dairy produce from Floating Farm, our eggs from Eike, our Beemster cheese, and our veal from Farm Fields which are among the most sustainable in the world.

Neither do we throw anything away. NOTHING. So help us too, for example order one of our pizzas or lunch packs in which we use 'no waste' products, or dine on the menu of the day and enjoy the surprise.

We believe in taste and then sensation of taste. That is why we recommend you choose one of our packages in which we have put together a varied assortment, so you not only taste many different flavours, you also enjoy a surprising variety that guarantees a healthy energy balance.

We are proud to introduce our banqueting booklet. As Food&i we offer a varied range to suit your own needs and type of event. Obviously we can also supply individual dining options created especially for particular events on location.

Kind regards,

Team Food&i Willemswerf

OUR IMPACT

Food with impact!

Food&i serves food with impact. Banqueting is approached from a strong vision of a healthy and diverse diet for all.

A menu with delicious food, a varied range and local producers. Each day is different with differing tastes, plant forward (with sustainable meat and fish, and especially lots of vegetables), good for your body and mind and above all: extremely reliable.

Everything on the menu at Food&i is tasty and good for the planet, people and animals. That means making (sometimes difficult) choices and wanting to tempt you to join us on our journey. A journey where you taste new things, see what you eat, know what's in it and seriously fancy your snack, your hot meal, sandwich and salad. Eating and drinking at work has never been so much fun.

Our iconic range

These are the icons of our range, the products we focus on and which are most important to Food&i.

"Beter Leven" certified

This means all our Farm Fields veal products are 3-star "Beter Leven" certified, and it's the same for our Livar pork products. Just like our Vitello and Fricandeau sandwich.

A transparent chain

Our Beemster cheese comes from a company with a circular business along the whole chain. It has accordingly been voted the most sustainable cheese brand in the Netherlands for the fourth time.

Or what would you think of our home-made tuna salad made exclusively from Fishtales tuna. This is a company with MSC certification and a transparent chain.

Signature bread

We see our bread as an icon. We opt for bake-off in our range to be able to guarantee fresh bread and avoid food waste.

Should fresh bread be delivered, it comes from a local baker in the town or city!

Our transition to better and healthier!

A varied diet for everyone

The transition to eating less meat, but what do we serve at Food&i? Hybrid, meat substitutes & the quick fix! But what if we do eat meat? We know where our meat comes from and where animal welfare has been respected!

Nutriscore

Our entire range and menu is calculated using Nutri-Score. The purpose of the logo is to have consumers make healthier choices when they make purchases in a product group. Nutri-Score is a traffic light system with five levels, where A is the healthier choice and E the choice to avoid.

We opt resolutely for A&B, with C/D as an exception within our banqueting range. More information on [Nutriscore](#)

Allergens must be mentioned beforehand.

Our Food Code

The requirements made of all Food&i partners. Our code mentions all the standards and principles applicable to our range. This code describes how we see our menu, the preparation methods, our purchasing, how we work and everything else to do with our food and drink!

A banqueting order at Food&i means a journey on which you taste new things. On this journey we will take you to a predominantly plant-based range, with a limited supply of animal protein.

Are there allergies or particular dietary wishes? Tell us when ordering and we will take it into account.

Our food is the finished product!

Home made

Standard quality any time of the day. All our home-made recipes are based on our own recipe from our own central kitchen. At Food&i we make a constantly bigger share of our range ourselves. Fully developed from the Food&i vision to suit our guest.

Our food is for everyone

Clean label General reliability

Transparency based on the nutritional values. No or few numbers, only when they have a clear and explainable purpose.

It is possible that certain Asian flavourings and prepacked snacks are not yet 100% clean label.

Culinary Inclusivity

Food&i has a strong identity, but there is something for everyone in the realms of our concept! Whatever dietary or food pattern you or your colleagues may have, we have something to offer you and in the meantime give you the right tools and information to grow and improve where possible. This is how we together make an impact for a better world.

Cas & Kas croquette

The vegan traditional Dutch mini croquettes that taste just like what you are used to, but completely vegan! They are 100% vegetable and free of palm oil and soya. A deliciously crispy crust, creamy ragout and indistinguishable from real meat. Together with Cas & Kas we believe that these vegetable toppers will become the new standard. The ultimate taste experience with a minimal food footprint!

Captain Kombucha

Delicious, refreshing, sparkling and sugar-free kombucha, based on fermented tea. Handmade and 100% organic according to the traditional recipe. Only high-quality and natural ingredients are used. Together with Gutsy Capain, we believe that you and your senses know what's best for you and your body.

Streetfood style

Handy bites from all corners of the world. Japanese gyozas, our bao buns, tortilla wraps and pizzas.

18.40

GRO

What makes GRO special in the food sector is that their chain is short, completely circular and transparent. You know what you are eating and where it comes from. A delicious crunchy snack with a healthier twist. The snack contains oyster mushrooms so you unwittingly eat a little more vegetables. GRO's products help reduce the impact on the environment and are full of flavour. The starting point to a better future!

Smits produces Eike, the ultra-sustainable egg. They keep the production process in their own hands, from the chick, research, energy supply, manure processing to packaging. The whole process is virtually circular, so on the way to zero waste. The eggs are white, which means they are more environmentally friendly than a brown egg. And they bear the On the Way to PlanetProof quality mark. Distinctive and responsible!
